Utility

Popups

Create floating popups, menus, and tooltips using the power of [Floating UI](#).

TYPESCRIPT

Copy

```
import { popup } from '@skeletonlabs/skeleton';
import type { PopupSettings } from '@skeletonlabs/skeleton';
```

Installation Required

To begin, install [Floating UI](#) from NPM. This is required for popups to function.

TERMINAL

Copy

```
npm install @floating-ui/dom
```

Import Floating UI into your application's root layout `/src/routes/+layout.svelte`.

TYPESCRIPT

Copy

```
import { computePosition, autoUpdate, offset, shift, flip, arrow } from '@floating-ui/dom';
```
