

Colors

Skeleton themes extend Tailwind's color palette and can be used anywhere within your project.

Color	ID	Example
	<code>[style]-primary-[50-900]</code>	Typically your primary brand color.
	<code>[style]-secondary-[50-900]</code>	A secondary branding color for supplementary value.
	<code>[style]-tertiary-[50-900]</code>	A third and additional branding color.
	<code>[style]-success-[50-900]</code>	Used for successful or positive actions, such as a form sub
	<code>[style]-warning-[50-900]</code>	Used for negative or harmful actions, such as warnings.
	<code>[style]-error-[50-900]</code>	May be used for errors, alerts, and invalid inputs.
	<code>[style]-surface-[50-900]</code>	The base level colors, used for backgrounds.

Color Palette

Shade 500 is used as the default value.
