Svelte Action

# Clipboard

Allows you to quickly copy data to the clipboard.

TYPESCRIPT

Copy

```
import { clipboard } from '@skeletonlabs/skeleton';
```

 Source

 Page Source

Usage

Params

Copy

If your data is available as a primitive data type (string, integer, etc), you can provide it directly to the action.

## Copying HTML Contents

To copy the *innerHTML* for an element, set a `data-clipboard` on your target, then provide an `element` reference to the action.
