

Get Started

We recommend at least moderate experience with [Svelte](#), [SvelteKit](#), and [Tailwind CSS](#) before your proceed.

Please be aware that Skeleton only supports [SvelteKit applications](#) at this time.

Create Your Project

Skeleton CLI Manual Install

We highly recommend the Skeleton CLI for creating new Skeleton projects. This will automatically scaffold a new SvelteKit application, install Tailwind, configure Skeleton, and more.

TERMINAL

Copy

```
npm create skeleton-app@latest my-skeleton-app
  - Enable Typescript when prompted (recommended)
cd my-skeleton-app
```

Install Skeleton

Skeleton CLI Manual Install

The CLI will automatically install Skeleton and the Skeleton Tailwind plugin.

Install Tailwind

Skeleton CLI Manual Install
