

Utility

Local Storage Store

An extended version of the [Svelte writable store](#) that includes pub/sub to local storage.

TYPESCRIPT

Copy

```
import { localStorageStore } from '@skeletonlabs/skeleton';
```

Source

Page Source

Usage

The first parameter `storeExample` is the local storage key name. The second parameter is the initial value of the store.

TYPESCRIPT

Copy

```
import type { Writable } from 'svelte/store';
```

TYPESCRIPT

Copy

```
const storeExample: Writable<string> = localStorageStore('storeExample', 'initial ValueHere');
```

Operates as a standard Svelte writable store but with the added benefit of automatic persistence via [Local Storage](#).

TYPESCRIPT

Copy

```
import { get } from 'svelte/store';
```

```
// Subscribe to the store  
storeExample.subscribe(() => {});
```

```
// Update the value  
storeExample.update(() => {});
```
