Usage

Body Background

Your app's background is automatically set via a [design token](#) class. Adjust your theme's color scheme to customize. This affects both light and dark mode.

CSS

Copy

```
body { @apply bg-surface-50-900-token; }
```

Selection

Selection color is also set via a token class. Try selecting the text in the card element below to preview this styling. Notice how selection color changes depending on the background.

The quick brown fox jumps over the lazy dog.
