# Figma

[🔗 View on Figma Community](#)

A community-maintained Figma design kit for Skeleton.

## Introduction

The Figma kit is designed to match the structure of the components and properties in Skeleton. This can assist both designers and developers in create and mocking stunning user interfaces.

## Features

- Made with Autolayout
- Theme support with variables
- Composable with slots
- Tutorial (limited to Alerts at the moment)
- Playground

## Attribution

This [Figma UI kit](#) is maintained by [Micha](#) and [Bohdan](#). If you have any questions or feedback, please feel free ping these members on the Skeleton community discord via [@Micha](#) or [@Bodya](#).
