Tailwind

Gradient Headings

Create gradient-colored heading styles.

</> Page Source   ↙ Tailwind Gradients

Usage

Can be generated using [Tailwind's gradient color stops](). Skeleton is not required.

Using @apply

Create a new class using `@apply` in your `app.postcss` global stylesheet. Then apply the following styles.

```css
CSS                                                                Copy

.gradient-heading {
    @apply bg-clip-text text-transparent box-decoration-clone;
    /* Direction */
    @apply bg-gradient-to-br;
    /* Color Stops */
```
