Utility
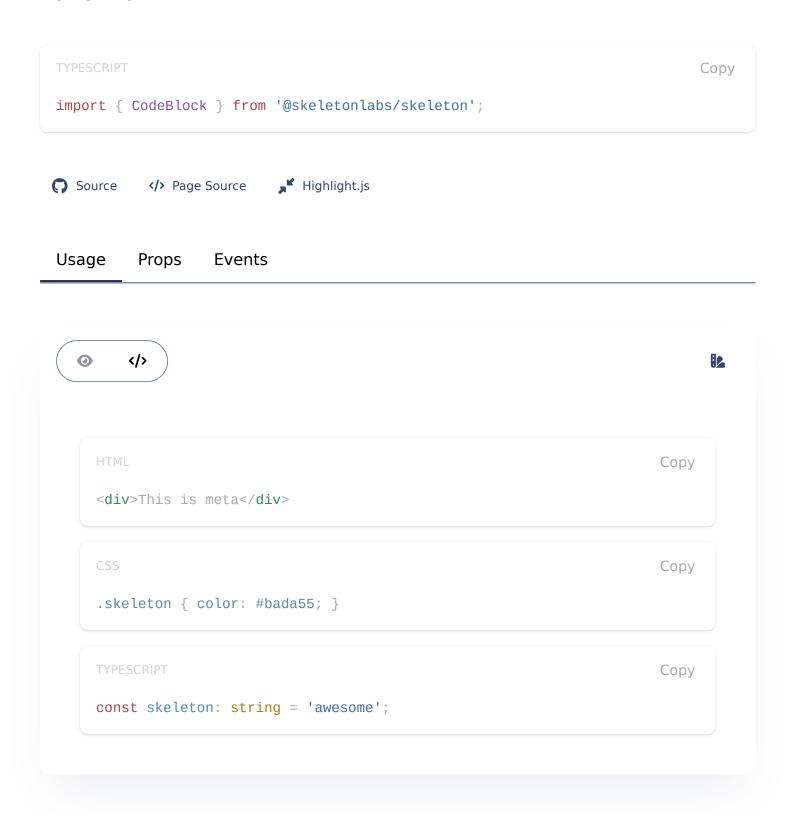

Code Blocks

Displays pre-formatted source code, with optional support for Highlight.js syntax highlighting.

```
TYPESCRIPT                                                    Copy

import { CodeBlock } from '@skeletonlabs/skeleton';
```

📍 Source   </> Page Source   ↙ Highlight.js

Usage   Props   Events

```
HTML                                                          Copy

<div>This is meta</div>
```

```
CSS                                                          Copy

.skeleton { color: #bada55; }
```

```
TYPESCRIPT                                                   Copy

const skeleton: string = 'awesome';
```

Install Highlight.js
